

This weekend: Healey racing at Silverstone

We are proud to announce that Anders Schildt will participate in this year's Healey Drivers International race at Silverstone 21st of June.

Ander will be driving together with former British Hill climb champion David Grace in his BRG Healey 3000.

David and Anders together won the international Healey race at Castle Combe 2013 and last year David won it on his own.

David and Anders after their victory at Castle Combe 2013.

"I am really glad that David gave me this chance. Not only is it great to get back to racing with David. The opportunity to race with one of the best drivers in a very well prepared car is second to none" – says Anders.

Since the opening ceremony 9th of May there has been plenty of activity in the workshop.

Race and road cars have occupied all of the five permanent work stations. Customers keep coming in for parts or help with their restorations.

“It is not unusual that we receive engines, steering columns, differentials, gearboxes and more to partly assist customers in their restorations” says Peter Zetterlund, one of the employees.

On the pictures you can see some of the cars and activities going on at right now.

We are also glad to announce that our Helipad is now ready for use by customers who also have an interest in aviation. So if you happen to fly our way; Please, drop-down for a chat and a cup of coffee!
